ForeverSafe Security Screens Security and Storm Protection - Built to Last

Fixed Windows

Fixed security and storm windows are non-moving panels that can be installed over the existing windows in your home. They cannot be effectively pried open, kicked down or cut; ensuring your home is safe and secure. Fixed window panels work with various types of windows; including louvers, double hung and sliding windows. They are custom designed to complement your home and provide your family the protection and peace of mind. Fixed window panels are available in several frame styles and colors to match your home or business.

Fixed window panels enhance your lifestyle and safety. They allow you to keep your regular windows open to help keep your home cooler in the summer and enjoy the fresh air all year round without compromising your safety or security. Security screen mesh helps reduce solar heat gain by 53% while allowing for unhindered visibility from your home. ForeverSafe security screens also work as bug screens, allowing airflow in while bugs and other intruders are kept out!

Unlike traditional security grills or windows fitted with bars, our security screens are stylish and will complement any decor. ForeverSafe Security Screens are nearly impossible to cut, kick down or pry open, ensuring your home is safe and secure.

Features & Benefits

Expert installation	ForeverSafe Security Screens are custom built and expertly installed
Smaller frame sections	Boasting the strength of door frames, but with a smaller frame width.
Slimline design	Heavy duty protection without heavy duty looks
304 Tensile-Tuff® security mesh	Stainless steel security mesh is up to 26% thicker than other mesh products on the market, making it stronger and harder to cut or penetrate.
Custom built	Means a perfectly fitted job. Product can be made to fit the design and format of your windows.
Enhanced lifestyle	ForeverSafe Security Screens provides unhindered views, keeps out mosquitoes, and lets you keep a cool, safe house all year round.
Solar heat gain	Solar heat gain is reduced by up to 53% reducing dependence on air-conditioning.
